<h1>■ VulnBot AI Security Report</h1>
<p>Found 18 recent vulnerabilities. Showing latest 5.</p>

<div style="border:1px solid #ddd; border-radius:10px; padding:16px; margin-bottom:18px;">

<h2>CVE-2026-15473</h2>
<p>Source: NVD</p>
<p>Vendor/Product: Unknown Unknown</p>
<p>Issue: A vulnerability was identified in Eleveo Call Recording Software 9.7.0. This issue affects some unknown processing of th</p>
<p>Priority Score: 48/100</p>
<p>CVSS: 6.3</p>

<hr>

<p>What happened: An improper authorization vulnerability was discovered in Eleveo Call Recording Software version 9.7.0, specifically within the /callrec/restoreCallAction.do endpoint, allowing remote attackers to bypass authorization controls.</p>
<p>Who is affected: Users of Eleveo Call Recording Software version 9.7.0.</p>
<p>Personal relevance: Low</p>
<p>Reason: The user's environment consists of modern web frameworks (FastAPI, React, Next.js), AI tools (Ollama), and general-purpose OSs, with no mention of Eleveo Call Recording Software in their tech stack.</p>
<p>Risk level: Low</p>
<p>Should I care: No</p>
<p>Recommended action: No action required unless Eleveo Call Recording Software is deployed in an undisclosed part of the environment.</p>
</div>

<div style="border:1px solid #ddd; border-radius:10px; padding:16px; margin-bottom:18px;">

<h2>CVE-2026-15471</h2>
<p>Source: NVD</p>
<p>Vendor/Product: Unknown Unknown</p>

<p>Issue: A vulnerability was found in Eleveo Call Recording Software 9.7.0. This affects an unknown part of the file /callrec/pci</p>
<p>Priority Score: 46/100</p>
<p>CVSS: 4.3</p>

<hr>

<p>What happened: An improper authorization vulnerability was discovered in Eleveo Call Recording Software version 9.7.0, specifically within the /callrec/pci_dss_status.jsp file, allowing remote attackers to bypass authorization controls.</p>
<p>Who is affected: Users of Eleveo Call Recording Software version 9.7.0.</p>
<p>Personal relevance: Low</p>
<p>Reason: The user's environment consists of modern web frameworks (FastAPI, React, Next.js), AI tools (Ollama), and general OS/cloud tools, with no mention of Eleveo Call Recording Software in their stack.</p>
<p>Risk level: Medium</p>
<p>Should I care? No</p>
<p>Recommended action: No action required unless Eleveo Call Recording Software is deployed in an undisclosed part of the environment.</p>
</div>

<div style="border:1px solid #ddd; border-radius:10px; padding:16px; margin-bottom:18px;">

<h2>CVE-2026-15474</h2>
<p>Source: NVD</p>
<p>Vendor/Product: Unknown Unknown</p>
<p>Issue: A security flaw has been discovered in Eleveo Call Recording Software 9.7.0. Impacted is an unknown function of the file</p>
<p>Priority Score: 46/100</p>
<p>CVSS: 4.3</p>

<hr>

<p>What happened: An improper authorization vulnerability exists in Eleveo Call Recording Software 9.7.0, specifically within the /callrec/audio.jsp file. A remote attacker can manipulate the 'callId' argument to bypass authorization checks.</p>
<p>Who is affected: Users of Eleveo Call Recording Software version 9.7.0.</p>
<p>Personal relevance: Low</p>
<p>Reason: The user's environment does not list Eleveo Call Recording Software among their tools, frameworks, or vendors.</p>
<p>Risk level: Medium</p>
<p>Should I care? No</p>
<p>Recommended action: No action required unless Eleveo Call Recording Software is deployed in an undisclosed part of the environment.</p>
</div>

<div style="border:1px solid #ddd; border-radius:10px; padding:16px; margin-bottom:18px;">

<h2>CVE-2026-15470</h2>
<p>Source: NVD</p>

Analysis

```
{
  "risk_level": "Low",
  "risk_score": 25,
  "suspicious_indicators": [
    "Sender email address does not match recipient email address.",
    "Subject line uses an alarm emoji.",
    "Report focuses on a software (Eleveo Call Recording Software) not mentioned in the recipient's known tech stack.",
    "Multiple CVEs reported for the same software version."
  ],
  "reasons": [
    "The email claims to be a security report but originates from a Gmail address.",
    "The email repeatedly states the vulnerabilities are not personally relevant, suggesting a broad, untargeted campaign.",
    "The email's content, while detailed, focuses on a specific software the recipient may not use, potentially increasing the likelihood of a false positive.",
    "The 'Personal relevance' section consistently indicates 'Low', which is unusual for a targeted security alert."
  ],
  "recommended_action": "Verify the legitimacy of the report through official security channels or the software vendor's website. Do not click any links within the email."
