

Phishing Email Analysis Report

Generated: 2026-07-13 23:40:46

Original Email

URGENT: Your bank account has been suspended.

Verify your identity immediately using this link:
<https://login-verify-bank-security.com>

Failure to act will permanently block your account.

Analysis

Phishing Analysis:

Here's a breakdown of the findings:

1. **Risk Level:** Medium

2. **Suspicious Indicators:**

* **URL:** `https://login-verify-bank-security.com`

* **Phrase:** "urgent"

3. **Why Suspicious:**

* **URL:** The domain `login-verify-bank-security.com` is likely not a legitimate bank website. Real banks use their official domain. The name is designed to *look* official but is a common tactic for phishing.

* **Phrase:** The use of "urgent" and threats of account blockage are pressure tactics frequently used in phishing emails to rush you into action without thinking.

4. **Recommended Action:**

* **Do not click the link.**

* **Independently verify:** Contact your bank directly through a known phone number or by typing their website address into your browser (do *not* use links from the email).

* **Report:** Report this email to your bank and/or your organization's security team.

Important Note: This analysis highlights potential risks. It does *not* guarantee the email is malicious, but the indicators suggest caution is strongly advised. Always prioritize verifying information through official channels.
